Instructive Nostalgia

By James M. Decker

Why does nostalgia stir our hearts and minds?

It is a fascinating thing. Our brains tend to remember the past as we choose to remember it. Good memories stand out, while bad memories are often glossed

over. Sometimes, bad memories are repurposed towards the good ("it made me tougher!"). We can glorify the "good old days" without examining whether they were as "good" as we remember.

From an emotional standpoint, there's nothing wrong with nostalgia. This helps us draw closer to our roots. It helps us find a proper perspective on life and how we fit within a changing world. On the other hand, nostalgia can be a problem when it overtly influences public policy. Nostalgia can distort a leader's decision-making process. It can cause us to try and re-create a past that existed only in rose-colored memories and never in reality.
