Mozzarella sticks, marinara sauce, tomato cup, salad, strawberries, milk
Friday, September 22
Fish sticks, mac and cheese, carrots, celery, grapes, pudding, milk

...TPWD water input

(Continued from page 3)
"On public lands, there's a commitment to develop a state park land acquisition strategy to design and construct five new state parks. That's really a 10-year outcome," Birdsong said.
Goals also include hosting 31.5 million park visitors, adding new trails, committing to maintain 1.4 million acres of public hunting lands and creating or improving local parks through a recreation grants program.
Objective four is to "foster conservation of healthy ecosystems on private lands."
"On the private lands front, we will continue to invest heavily in

tech guidance to private landowners to develop wildlife management agreements," Birdsong said. "We'll support 35 new conservation easements over the next 10 years, protecting 56,000 acres of private working lands through our Farm and Ranch Lands Conservation Program."

The department is also committing to enhance the scope and functionality of a database and GIS (geographic information system) framework the wildlife division maintains to track investments and incentives such as through made through the Landowner Incentive Program or Grasslands Restoration Program.

Other objectives are: maintain the highest level of scientific validity and credibility; restore, recover, and protect Species of Greatest Conservation Need, including state and federally listed species; establish and enforce regulations to conserve fish and wildlife resources; protect and interpret cultural resources; anticipate and plan for emerging conservation issues; provide a variety of high-quality, nature-oriented outdoor recreational opportunities on TPWD sites; encourage people of all ages, backgrounds, and abilities to experience the outdoors; encourage nature and heritage tourism; cultivate support for the conservation of natural and cultural resources; increase awareness of the value of urban and suburban ecosystems.

TPWD will continue to invest in Hunter Education, angler education, shooting sports programs and the Texas Outdoor Family Program.

Texas Game Wardens will continue to invest in enforcement of fish and game laws, as well as boating laws.

"We also have committed to conduct assessments of our laws and regulations and enforcement surrounding two key issues," Birdsong said. "One is fish and wildlife habitat protection. The other is related to aquatic invasive species management. Those assessments would likely result in potential regulation changes to better protect fish and wildlife habitat and prevent the spread of aquatic invasive species."

To develop this draft plan, TPWD solicited public and targeted feedback of TPWD's performance and priorities earlier this year.

TPWD then presented an initial draft plan to the Texas Parks and Wildlife Commission in August.

The plan, including strategies and actions for each objective, is available here.

The public can comment on the plan through September 30.

After the public comment period closes, TPWD will review the information received and address those items.

TPWD staff are expected to present a final version of the Land and Water Plan to the TPW Commission for consideration in November.
